EDUCATION

Fullstack Web Development

CodeGo

February - May 2023

Bachelor's Degree in Business

Administration Major in Marketing

Pamantasan ng Lungsod ng

Marikina

2007-2014

OBJECTIVE

Detail-oriented and motivated Junior Fullstack Web Developer with a strong foundation in front-end and back-end development. Eager to join a dynamic team where I can utilize my technical skills, learn from industry professionals, and contribute to the development of cutting-edge web solutions.

PROJECT EXPERIENCE

Project Leader

Capstone Project: Print Studio

- "Print Studio" is an e-commerce website that showcases a combination of technologies. The user-facing page of the website is developed using ReactJS, providing a dynamic and interactive experience for customers. On the admin side, Laravel is utilized, offering a robust and efficient framework for managing the website's backend operations. The MySQL database is employed to store product details and user accounts, ensuring secure and reliable data storage for seamless functionality.
- The concept behind Print Studio is to develop an e-commerce website specifically tailored for an established printing business. The primary objective is to provide the store owner with a comprehensive platform to efficiently manage customers, suppliers, and products simultaneously. By leveraging the capabilities of the website, the store owner will have a centralized system to handle various aspects of the business, such as customer management, supplier coordination, and product inventory. This holistic approach aims to streamline operations and enhance overall efficiency for the printing business.
- The project "Print Studio" earned the distinction of being the best capstone project due to its exceptional functionality and industry-ready capabilities.

Soft Skills:

- Strong problem-solving and analytical thinking abilities
- Excellent communication and collaboration skills
- Detail-oriented with a focus on delivering high-quality work
- Ability to work in a team and learn from experienced developers
- Eagerness to learn and stay updated with new technologies and frameworks

Technical Skills:

- Proficient in HTML, CSS, JavaScript, and front-end frameworks (e.g., React, Laravel)
- Familiarity with back-end technologies like Node.js, APIs
- Experience with database systems like MySQL
- Version control using Git and familiarity with Agile development methodologies
- Understanding of responsive design principles and cross-browser compatibility
- Familiarity with cloud platforms (e.g., AWS, Azure) and deployment tools (e.g., Heroku)
- Awareness of web security best practices and performance optimization techniques
